Dear Gerry, gm ouched

4/22/92

In going over some long-unfiled file folders this morning I found the affidavit Jim Tague executed for me in C.A. 75-226, the first case filed under the Act as amended in 1974, the amending of the investigator files exemption attributed to the case this amounted to refiling. It was the spectro case.

I'll be making a copy of the affidavit for you and Dave.

In the folder I found what I enclose, some exhibits to his affidavit he annotated.

What apparently happened os that he provided more than one set and I attached one set to the original of the affidavit and the copies were made from it, including the exhibits.

In sseing these I wondered if you have a student who might regard this as an interesting souvenir.

So, on th4 chance you do, I enflose what apparently began as a negative photostat. Which should be plural.

Best,

Harold
